

BUSINESS SUPPORT SERVICES PROGRAM

Funded by the EDA Build to Scale Venture Challenge Award #ED230IE0G0119

ELEVATING THE RAPID CITY ECONOMY FOR ALL

elevaterapidcity.com

APPLICATION

These services are intended to help grow the number of tech-based startups in the Rapid City Metro. Although these services are meant to help derisk the early stages of company formation, it's anticipated that the technology will have gone through customer discovery and validation and early-stage business planning through programs such as NSF I-Corps or SBA FAST. Owners should be able to readily answer questions about their technology in terms of technology readiness and market potential.

FUND GUIDELINES

- Funds will be awarded on a first-come, first-served basis.
- Amount not to exceed \$5,000 per service per startup (up to \$15,000 total per startup.)
- Services will be direct billed to Elevate by the service providers.
- Services are available to tech-based startups built around proprietary innovation, including university research, protected intellectual property, or novel software platforms, with the potential to scale rapidly through technology development rather than labor-based service delivery.

Proprietary data and company information will be kept confidential, but the EDA requires Elevate to report aggregated information about companies accessing these services and affiliated program on a semi-annual basis. You may be asked for further information in order to complete these reports.

HOW TO APPLY

Please type or print clearly. Be sure to fill in each blank and answer each question. If not applicable, mark N/A and explain. If there is not enough room, attach additional sheets.

The application must be submitted electronically to: **grants@elevaterapidcity.com**.

REVIEW CRITERIA

Each category is equally weighted in the review process.

1. Technology Readiness & Potential

- Does the applicant clearly describe the technology or product?
- Is the source of technology identified (student-developed, university IP, independent)?
- Does the technology have potential for commercialization?
- What is the assessed technology readiness level?
- Does the applicant have a clear MVP or prototype plan?
- Has the applicant made use of POC, SBIR, or STTR programs?

2. Customer Discovery & Market Validation

- Has the applicant conducted customer interviews or validation?
- Are TAM/SAM/SOM estimates provided?
- Does the applicant show understanding of target market and value proposition?

3. Business Planning & Financial Preparedness

- Does the applicant have a draft business model or plan?
- Are financial assumptions and revenue model outlined?

4. Funding & Growth Strategy

- Does the applicant show readiness for fundraising (grants, VC, angel)?
- Is there a clear plan for investor engagement or capital needs?
- Linked to Number of Venture Capital applications / awards.
- Is there a clear path for how the funds and contracted services will help the applicant access venture capital or increased revenues?
